

Duke Clinical & Translational Science Institute (CTSI) Community Engaged Research Initiative (CERI)

Consultation Services

Entry point to all CERI programs and services. CERI assesses community-engaged research questions and needs and offers recommendations.

Request a consultation at bit.ly/cericonsult.

Community Consultation Studios

Bring together community members who have been affected by a health issue to share their lived experiences with researchers to enhance research. *Community members are compensated.*

AME Zion HEAL Partnership

AME Zion churches serve as partners, co-learners, and advisers to Duke Health to ensure that clinical research participation accurately reflects the communities of North Carolina.

Sparks Studios

Facilitated group discussions with community-based organizations, patients, researchers, and other stakeholders who work together around common health topics to “spark” innovation and research partnerships.

Education and Awareness Trainings

Learning opportunities for communities and researchers to develop trusting relationships and increase knowledge on impactful collaborative research based on the principles of Community Engaged Research.

Examples from the Field

Bi-monthly education programs to advance community engaged research (CEnR) in communities and at Duke.

E-Library

A collection of toolkits, resources, publications, articles, and readings that community members and researchers can utilize that supports the sharing of information, expertise and dissemination of CEnR resources.

Visit bit.ly/ceri-e-library.

Population Health Improvement Awards

Provide support to new and advanced partnerships for community organizations/groups and Duke researchers to address health problems through an annual funding program of up to \$25,000.

Currently not active.
